Div. of Embedded Designs, Inc

To: All Our Valued Customers, Suppliers and Stakeholders World-Wide

First and foremost, we have taken steps to ensure the safety of our employees. There are many uncertainties in our current world, please rest assured KIC is here to support your needs. We have taken measures to safeguard an uninterrupted supply chain and all orders will be processed and shipped as usual to the best of our abilities. Service and installation will be scheduled as normal, compliant with your facility policies and government restrictions.

Embedded Designs, Inc., dba KIC, based in San Diego, is a supplier of manufactured products and equipment to critical infrastructure companies as defined in the CISA (Cyber Infrastructure Security Agency – Homeland Security) document issued by the federal government March 19, 2020 and referenced by the California Governor’s Executive Order N-33-20 on the same day. To be more specific, KIC is a critical part of the supply chain for Aerospace, Defense, Medical, Technology and Telecommunications infrastructure.

KIC’s operations have been modified to meet all guidelines from the CDC for a safe work environment for all its employees, including social distancing mandates and sanitization practices. All employees who can, are working from home. Employees who need to be in a facility have been assigned to split work groups to further ensure their health and safety, applicable to production, quality assurance and shipping functions. These current practices can be scaled as needed should further government guidelines mandate.

We are committed to the needs and safety of our valued workers, their families and those they might come in contact with. It is our intent that these practices will protect them, the longevity of our business and the ability of our customers to continue serving critical needs, affected by COVID-19.
